Prices Subject to Change

* Check website or call for latest pricing.

We are happy to provide the information to help you make a decision
on the tools you need or want.

Prices do not include shipping.
Pictures are not to scale. Stock photos may be used.
Colorations may vary from pictures.

Disclaimer Metalworking is inherently
dangerous. Knowledge of materials, equipment,
and procedures are the responsibility of the user.
We assume no responsibility for use of the
products we sell. Improper use of tools and
equipment are a sure way for accidents to happen.
We strongly recommend formal training and study
in metalwork prior to use of our products.

All hammers, punches, hot/cold cutters,
and flatters complete with handles unless noted.
Many Hammers require final finishing of
face, peen and handle.

**Pursuant to Federal and State Nexus Tax Laws, Blacksmiths Depot has been contacted to
pay sales tax in several states. If your state has made this request we will start collecting
your states sales taxes on Nov. 1 2020.**

The Double Horned anvils are made entirely from high grade steel for maximum durability. The Work surface of each anvil is precision ground and hardened using a special Peddinghaus process which results in a lively work surface with unmatched precision and quality. Peddinghaus steel anvils are excellent for Blacksmithing, iron work, and various industrial applications. Peddinghaus anvils give you quality and craftsmanship, with the dependability you expect.

FEATURES INCLUDE:

- * Drop Forged Steel Construction
- * Milled, Hardened Work Surface
- * Generous Round Horn For Bending and Shaping
- * Wide Stable Base to Absorb Force
- * Hardy Hole For Various Tools
- NOT CAST!!

PERUN ANVILS

For centuries anvils have been one of the basic and the most important blacksmith's tools. Over the years, their shape and treatment have changed, as well as the material from which they were produced. Knowledge and experience of the best Polish and foreign blacksmiths helped us to create our anvils, which characterize by ideal proportions, unique shape and excellent technical parameters. These anvils are manufactured entirely from specially-chosen alloy steel. We do not weld the face and the leg of the anvil together.

Instead, we cast the whole anvil. Every casting is always checked for possible casting defects such as cracks, shrink cavities, etc. After passing quality control, our castings are heat treated and precisely machined. The face of the anvil is hardened by quenching, and its edges are tempered so that it does not crumble at work. After heat treatment the working surface is also ground.

Juma® Scales \$30.00 to \$32.00 per pair

High quality, modern processing material for production of componets and art objects.

It is a collection of various minerals embedded in resin.

It has excellent workability such as drilling, milling, grinding and polishing.

Low breakage due to is high modulus of elasticity and homogenous structure

High quality surface due to high surface hardness and low abrasion loss

Resistant to many common substances such as detergents and oils

Low water obsorption

Can be thermally shapped in boiling water

***** See pictures on the website *****

Multiple colors and styles available

Carbon Juma® Scales

Juma® Gem Scales

Snake Juma® Scales

Dragon Juma® Scales

CrazyFiber Scales \$35.00 Pair

CrazyFiber is an amazing composite material similar to micarta made of fabric and resin for makers and artisans.

These knife scales have vivid designs which make them unique for any of your projects that require scales or inlays.

These come in either an X or Y cut

***** See pictures on the website *****

Harley Quinn in X or Y

Bangal Tiger in X or Y

Electric Zebra in X or Y

Kirinite™ Scales \$20.00 - \$25.00 per Pair

Versatile, innovative acrylic sheet material that is bringing new excitement to an ever-increasing variety of products. Comes in a wide array of alluring colors and patterns great for making handles.

***** See pictures on the website *****

Multiple colors and styles available

Raffir® Stabilized Spalted Beech \$40.00

Raffir® Stabilized Burl \$40.00

High quality brand of stabilized wood.

Handle blocks are 4.75" x 1.5" x 1"

Our stock on knife scales changes daily.

**The Master Bladesmith
Advanced Studies in Steel
by Jim Hrisoulas**

This advanced study of steel reveals forging secrets that for centuries have been protected by guilds. Never-before-seen instructions, diagrams and photos explain the tricks behind using Japanese mokume gane, differential heat treating, power hammers, and other techniques to make kukris, wavy blades, spears and swords that bear the master's mark.

**Secrets of the Forge
The Blacksmiths Project Book
Both by Antonello Rizzo**

These two highly reviewed books provide blacksmiths with what are probably the most varied, the most interesting and most modern blacksmithing projects available today in a printed format.

The beginning and intermediate projects in the 1st book have the aim of teaching blacksmiths new skills and techniques in a methodic, step-by-step fashion using excellent color photos and complete written instructions. The more advanced projects in the 2nd book give more freedom to the blacksmith to use his or her creativity to deviate from the instructions and personalize the projects.

"Secrets of the Forge" contains 48 different projects for beginning and intermediate level blacksmiths. It begins with basic smithing jobs such as twisting bars and making spearhead shapes and scrolls. As you progress through the book the projects become more difficult and complex and involve forging truly artistic iron sculptures such as a duck in flight, a snail, flowers, a dragon, a nude, and more.

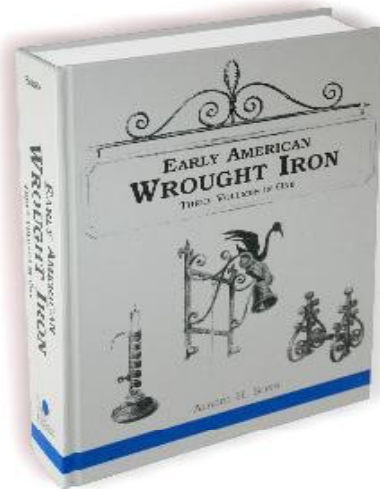

It is a large 250-page hardcover book which measures 9-½-inches x 11-¼-inches.

#book-secrets \$45.00

"The Blacksmith's Project Book" is described quite accurately in the following paragraph by the editor of the The Saltfork Craftsmen Artist-Blacksmith Association Newsletter: "You will find twenty projects from various, mostly European, smiths presented with 900 quality color photographs showing key steps for each project with brief explanatory text. Many of the projects are contemporary art sculptures. Some have that certain contemporary "look" (think Zeevik Gottlieb from Israel who demonstrates the first project - a joined figure sculpture.) There is an interesting Venetian door knocker, a somewhat utilitarian billhook project and window shutter stop as well. Each project is documented with photos of key steps including which tools are used and how they are used. The brief text explains the processes very well without getting overly bogged down in explaining the basics. The feel is almost like traveling in person to watch demonstrations in the various smiths' shops. Stock sizes are given for each project (in imperial units.)" The book is a 248 page hardcover.

Early American Wrought Iron by Albert Sonn

The Ultimate Old House Coffee Table Book

The Bible of Colonial Hardware

Over 3000 very fine drawings and sketches of different pieces.

Includes many histories of the buildings the pieces were on. Albert Sonn, draftsman and artist, spent 8 years traveling and sketching items for this book

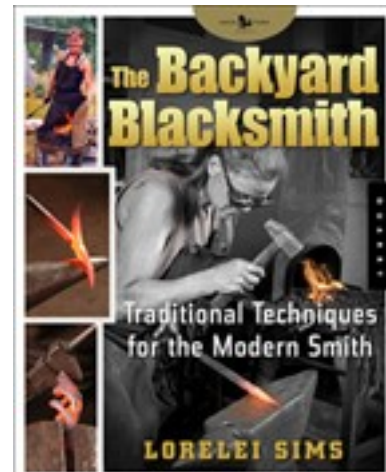

Product Specifications

3000+ sketches of wrought iron hardware Almost 2" thick

Full 8.5" x 11" semi-gloss pages

Totally redone with sharper images in 2007

#882 \$120.00

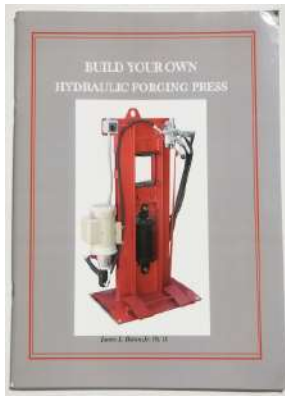

The Backyard Blacksmith by Lorelei Sims

The Backyard Blacksmith shows you how -- with some patience and a working knowledge of metals, basic tools, and techniques -- blacksmithing can be easy to learn, and a rewarding hobby. Through instructions and illustrations, readers will learn to make simple tools and useful items, such as nails, hinges, and handles, and also an interesting mix of artful projects, such letter openers, door knockers and botanical ornaments.

Build Your Own Hydraulic Forging Press By Jim Batson

This book and drawings are designed to help you build your own 24 ton Hydraulic Forging Press. A two horsepower 220 volt single phase motor running at 1725 RPM powers a 5.5 gallon per minute "Hi-Lo" hydraulic pump.

Ram force of 24 tons is applied by a 5" diameter double acting hydraulic cylinder at 2500 psi pressure. The movement of the ram die is controlled by a 4 way, 3 position hydraulic valve. The length of the ram stroke is 8". The maximum speed of the ram is 1.1 inches per second. The ram speed can be doubled by using a 5 horsepower electric motor running at 3600 RPM. A section is included which will enable you to alter a Log Splitter for use as a Forging Press

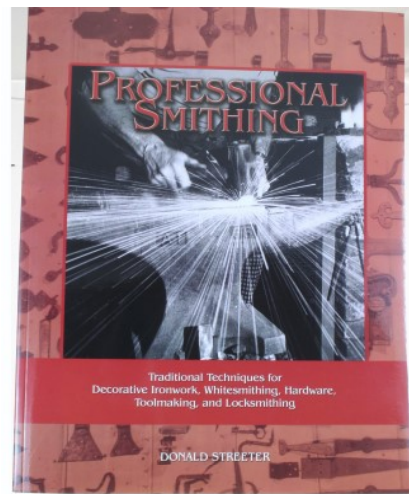

Soft cover copywrite 1994
Pages: 46 Illustrations: 35
#batson press \$30.00

Hydraulic Forging Press for the Blacksmith by Randy McDaniels

The hydraulic forging press is becoming increasingly important to the forging shop. This relatively small machine, which is often hand made, allows smiths to do many of the same operations as a power hammer while adding more control and expanding what one can do with hot metal.

200 pages, Full Color, Hardcover, 8.75" x 11.25"
#book-press \$45.00

Professional Smithing By: Donald Streeter

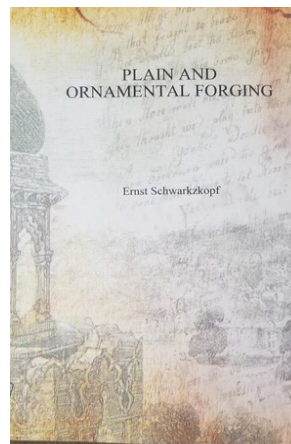

Included are detailed descriptions of work space layout, specialized tools and techniques, white-smithing, toolmaking, and lock-smithing.

Mr. Streeter demonstrates not only how things are done, but how they can best be done by others.

There is special emphasis on the crafting of early high-quality, hand forged kitchen utensils, fireplace tools, locks, keys, and decorative ironware: hinges, hasps, latches, bolts, hooks, springs, and more.

Paperback 144 pages. 257 illustrations. 2nd edition

#871 \$18.00

Plain and Ornamental Forging By: Ernst Schwartzkopf

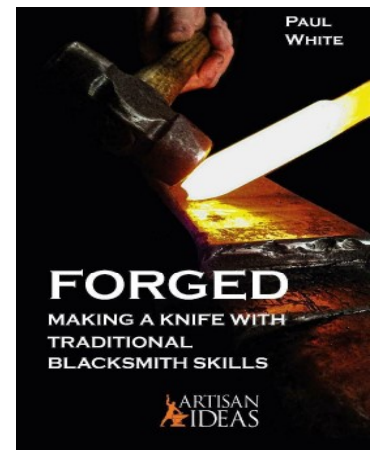

Here, available once more in reprint, is one of the most enlightening books written on the blacksmith's craft.

Called a "bible" of the trade by many because of its wonderful "teaching quality," it has been used by generations of blacksmiths as the seminal text on forging. Designed primarily to help the beginner in learning both the theory and practice of forge work.

Paperback 281 pages

2nd reprint in 2000 original book from 1930

FORGED: Making a Knife with Traditional Blacksmith Skills

By Paul White

This book will teach you to hand build a knife using the traditional method of blacksmiths of old

Traditional forging of a knife blade is a process which uses the ancient techniques of moving hot steel with hammer and anvil alone into a knife-form that is ready for filing, heat treating and sharpening with no or very minimal electric grinding.

Mosaic Damascus by ABS Master Smith Jason Knight

This three (3) DVD set demonstrates the making and forging of Mosaic Damascus steel at the New England Hammer In held at the New England School of Metalwork in Auburn, Maine.

DVD #1 of 3 is entitled "Mosaic Damascus: Basic Billet"

- 1) Mosaic Damascus Introduction
- 2) Billet Configuration & Forging Manipulation
- 3) Rotate & Distort Billet Configuration
- 4) W-Pattern Billet Transformation

AND MORE!

DVD #2 of 3 is entitled "Mosaic Damascus: 4-Way Mosaic"

- 1) 4-Way Mosaic Introduction
- 2) Process for 4-Way Mosaic Billet
- 3) Billets Etched, Ground & Dry Welding
- 4) Discussion of Mosaic Damascus for Blades

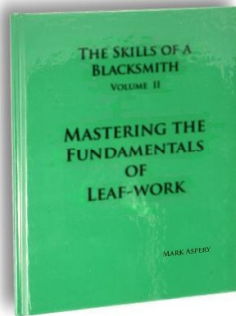

AND MORE!

DVD #3 of 3 is entitled "Mosaic Damascus: Blade Forging" and contains these Chapters:

- 1) Mosaic "Dry Weld" Blade Billet
- 2) Transforming Dry Weld to Blade Billet
- 3) Damascus Blade Patterns Discussion
- 4) Cut-off and Reorient Blade Billet

AND MORE!
